PERSONAL STATEMENT

As an experienced QA Engineer who has recently begun the journey into full stack development, I am looking to further expand my skills and knowledge in the technology field.

WORK EXPERIENCE

2019 - PRESENT

SOFTWARE QA ENGINEER // ICE MORTGAGE TECHNOLOGY

Collaborate with product and development teams to design the criteria for upcoming features, to avoid tech debt and be able to then automate the testing of features, so that we minimize the manual testing to have more exploratory testing.

SOFTWARE QA ANALYST // SIMPLIFILE

Worked on end-to-end manual testing, was responsible of reporting defects to maintain our leak/escape ratio below 8% per development cycle, write detail test cases/scenarios, as well as sprint test planning during regression phase.

2022 - PRESENT

INSTRUCTIONAL TEACHING ASSISTANT // 2U Inc.

After completing MERN Stack coding bootcamp, I was able to join the educational team at 2U Inc., as an Instructor's assistant, where I provide guidance to students when they have questions around the concepts they are learning throughout the bootcamp.

2014 - 2019

STRATEGIC BUSINESS DEVELOPMENT // VIVINT

Worked with development and sales teams to test equipment or initiatives in the real world, in order to gather data and confirm a product/initiative is ready to be offered to everyone.

SUPERVISOR // VIVINT

Worked as a supervisor for the technical support team, was in charge of 20 to 25 representatives, provided additional training as well as responsable to mantain policies and track performance of each representative.

EDUCATION

2016 - PRESENT

UTAH VALLEY UNIVERSITY // COMPUTER ENGINEERING

Currently pursuing a major in Computer Engineering. Have completed most of my Computer Science classes, from OOP to Algorithms and Data Structures.

2022

UNIVERSITY OF UTAH // FULL STACK CODING BOOTCAMP

To compliment my major as well to keep up with current and upcoming web development practices, went through a rigorous curriculum that covered the basics to MERN stack app development.

SKILLS

LANGUAGES

Javascript
Python
Typescript
C++

FRAMEWORKS

NodeJS
ReactJS

TOOLS

jQuery
Git
Codecept
Jenkins
GraphQL
Apollo

DATABASES

SQL(MySQL)
MongoDB
